To Whom It May Concern:

I am thrilled to report to you of the exciting progress and events of Dean and Melissa Lowman, Directors and Founders of Heaven's Reach Ministry. Their ministry to the country of Honduras continues to be met with great favor.

At present, Heaven's Reach Ministry continues to work with the public hospital in La Esperanza by providing medical supplies. Additionally, they have opened more medical clinics in impoverished areas that provide free medical care, medicine, and ultrasounds. I might add the incredible favor that they have found with the U.S. Air Force that continues to deliver medical supplies for them, expediting many of the normal channels that have proven to be a hindrance in third world countries. To me, this is amazing! To God be the glory! They have also expanded food reproduction through their Victory Farms Project that they have raised up, which are producing multiple crops each year.

From planting churches and feeding centers in remote areas to holding pastoral leadership conferences, Dean & Melissa stay productive! The list of their work could go on and on, from providing scholarships for kids in the schools to hosting groups from the United States in order to raise the awareness of their worthwhile projects. Dean and Melissa are diligent workers for the Kingdom of God and are making a difference in the lives of so many. I celebrate their faithfulness and thank you for your willingness to partner with them.

Blessings,

Pastor Steve
Senior Pastor
