Sustainable Agriculture Project - **Victory Farms**

Heaven's
Reach
Ministries

Give a man a fish and feed him for a day.

Teach him how to fish and feed him for a life time.

[Empower him to teach fishing and feed a country for a life time.](#)

This is sustainability agriculture.

Help us spread the word by forwarding this to your family, friends and coworkers.

Problems

Farmers cannot produce enough food for their families for the Lean Months. Some, along with their families live on just a tortilla or two a day. With few options, these farmers are forced to practically starve, cut down more trees in the rain forest, or leave their families for months at a time looking for work..

Deforestation is a problem do to the lack of production on farms and other factors.

Land owners who do not have the skills or resources often sell their land rather than farm; leaving them with funds for just a short time.

Unemployment is high resulting in a demoralized male population who turn to drinking.

Mothers with little or no education live in unsanitary conditions, unclean water, and little variety in their and their families diet resulting in malnutrition and chronic illness in the home, high-risk pregnancies, stunted growth and premature death.

Many of these mothers do not know about micro-organisms or how to defend against them.

Do you know a business man who looks for places to invest into the Kingdom?

Share Victory Farms with them. or let us know and we will contact them for you.

email us at dean@heavensreach.org

By starting a demonstration farm we can address each of these problems. Through Victory Farms we will Empower:

Farmers to grow more on their own by teaching new organic farming methods including introducing chickens as a sustainable source of protein and fertilizer resulting in less need for **Deforestation** to re-purpose the land.

Unemployed by employing them and teaching them the same methods as we do the farmers.

Mothers through the **Sustainable Healthy Living** program teaching nutrition, hygiene, and gardening then giving vegetable seeds for home gardens. Which, gives them and their families food security and access to vitamins and minerals.

Costs

[Victory Farms](#) will be a production farm as well as a demonstration farm making it sustainable with the ability to grow.

The development budget of \$250,000 will provide land, vehicles, buildings, operating capital and a water well.

After development this farm will produce sufficient income to not only sustain itself, assist the **Sustainable Healthy Living** Program but also provide a discipleship mechanism that will have a great impact on the local, regional and national culture of Honduras.

VF will provide farmer/chaplains in the public hospitals.

Please pray for this project and it's funding. All donations to the project will be tax deductible and made to Heaven's Reach

We are looking for high-school graduates, college students, medical professionals and retired farmers who would like to become interns or missionaries.
