Moving into position!

We have several pastors coming, starting in October to conduct pastor conferences. Next year we will be having conferences in two locations.

We have Honduran Interns coming to work with us starting in November. They will be working with our volunteers on discipleship.

We will be receiving the first of four containers of medical supplies and equipment soon.

Sept 4th we start working in Gracias Lempira, Honduras. We are introducing the Sustainable Healthy Living program to the Alberge, a ladies dorm for expecting mothers. This is a nutrition class of the Sustainable Healthy Living program.

The director of the Hospital in Gracias has allotted 2 acres for a garden to grow food for these ladies. The Budget for this location is \$500 a month. We currently have \$30 a month in designated donations. If you would like to help this project please email us.

We moved into a house closer to the hospital to prepare for the interns coming in November. This house had more room and better access. The house also needs a lot of furniture and a few appliances to make it functional. If you would like to contribute towards the additional beds, washer, dryer, and stove it would be greatly appreciated. The budget for this is \$1,500 and we have \$200.

Local Farm teaching us the best way to grow.

This farm is planted with a variety of vegetables and they gave us a tour showing us how they use a cover to protect the plants, gravity flow fertilizer infused drip irrigation

to minimize the expenses, and planting lines of corn to keep the insects away.
